3RD ANNUAL WESTERN ENGINE AND MODEL EXHIBITION

VALLEJO, CA, JUNE 1, 2009: On July 18 & 19, 2009, the Bay Area Engine Modelers club (BAEM) will hold their third annual Western Engine and Model Exhibition (WEME) show in Vallejo, California at the Vallejo Veteran's Building at 420 Admiral Callaghan Lane, Vallejo, CA 94591. Please go to www.wemeshow.com for further information or call Mike Rehmus at (707) 643-6396.

More than 200 operating scale models of Internal Combustion, Steam and Hot Air engines will be not only on display but running. Displaying their miniature engines from antique farm engines to modern supercharged V-8's, the builders of these operating marvels will be there to talk with show visitors. Visitors of any age will find fascinating examples of these engines and educational displays that demonstrate how the engines work.

Presented for the third year, WEME has been a hit with visitors and exhibitors alike. The informal atmosphere encourages discussions about how models are built, how one might build one for themselves and where to find general information on the hobby of Model Engineering.

Exhibitors need not be members of BAEM to exhibit at the show, but they do need to register by downloading an Exhibitor Registration form on the show Web site www.wemeshow.com or contacting Pat O'Connor at WEME, 1521 Queenstown Ct. Sunnyvale, Ca. 94087, pat1650@yahoo.com or 408-733-3710

BAEM was formed in 1994 to allow Model Engineers (those who build miniature engines) to exchange information about their work and to inform the public about the hobby. Please go to www.baemclub.com for further information or call Mike Rehmus at (707) 643-6396.

BAEM meets on the third Saturday of the month in the 1400 building at Chabot College, 25555 Hesperian Blvd in Hayward, CA 94545. The public is invited to attend any club meeting.

BAEM demonstrates model engines at many other venues including the Motor Sports Gathering at Quail Lodge during the Pebble Beach Concours weekend and the Goodguys West Coast Annual Hot Rod show,

For further information, contact Mike Rehmus.
